Mathematical Biosciences

an international journal

Volume 106 1991

MARTIN A. NOWAK AND ROBERT M. MAY (Oxford, England)
Mathematical Biology of HIV Infections: Antigenic Variation and Diversity Threshold 1

PATRICIA B. CERRITO (Louisville, Kentucky)
A Nonparametric Approach to Analyzing Large Human Populations 23

C. R. MURPHEY AND J. W. CLARK (Houston, Texas), W. R. GILES (Calgary, Alberta), AND R. L. RASMUSSON, J. A. HALTER, K. HICKS, AND B. HOYT (Houston, Texas)
Conduction in Bullfrog Atrial Strands: Simulations of the Role of Disc and Extracellular Resistance 39

C. R. MURPHEY AND J. W. CLARK (Houston, Texas) AND W. R. GILES (Calgary, Alberta)
A Model of Slow Conduction in Bullfrog Atrial Trabeculae 85

YASUHIRO TAKEUCHI (Hamamatsu, Japan)
Diffusion-Mediated Persistence in Three-Species Competition Models with Heteroclinic Cycles 111

GARY DE YOUNG (Davis, California), PHILIP K. MAINI (Oxford, England), AND MICHAEL NAKAMAYE (New Haven, Connecticut)
Analysis of a Risk-Based Model for the Growth of AIDS Infection 129

BOOK REVIEW

NABIL H. FARHAT (Philadelphia, Pennsylvania)
New Developments in Neural Computing (J. G. Taylor and C. L. T. Mannin, Eds.) 151

ANNOUNCEMENT 157

S. SICILIA AND D. A. SMITH (Clayton, Victoria, Australia)
Theory of Asynchronous Oscillations in Loaded Insect Flight Muscle 159

HERBERT W. HETHCOTE (Iowa City, Iowa), JAMES W. VAN ARK (Detroit, Michigan), AND IRA M. LONGINI, JR. (Atlanta, Georgia)
A Simulation Model of AIDS in San Francisco: I. Model Formulation and Parameter Estimation 203

HERBERT W. HETHCOTE (Iowa City, Iowa), JAMES W. VAN ARK (Detroit, Michigan), AND JOHN M. KARON (Atlanta, Georgia)
A Simulation Modeel of AIDS in San Francisco: II. Simulations, Therapy, and Sensitivity Analysis 223
